Membership Chair Report

March 2025

I have been working on figuring out and organizing the google drive, I just have a few questions about how I can do better in some areas

1. When I assign a mht # to a new member I have been adding it to their profile on membership works is that ok and can they access their profile or only us?

2. How do I access the MHC file that shows me all the info I got the password just not quite sure where I need to go to use the password to gain access

3. Do I only add people who have paid for a membership this year to the google drive or do I add everyone from last year too?

We have a few new members this year which is good to see and I'm working on sending them all an email with the show/clinic dates along with their new mht #. If there is anything else that you have questions about or what me to do better on please let me know!
